about

Industrial Designer specialising in the intersection of physical product design, machine learning, and human-centred technology, with experience developing consumer-product concepts, integrating electronics, and building AI tools for creative and user-focused workflows.

experience

ecais - maple bear
junior AI & design consultant — may - sep 2026

Advised on AI platform design for an initiative developing AI-literacy; contributed to workflow and process design for the platform.

dentsu creative
design internship - warsaw office — aug - sep 2023

Contributed to photoshoot editing, Instagram ad curation, and product photography across creative projects.

bozart
interior design internship — july - aug 2021

Produced client interior plans and custom furniture designs, balancing aesthetics with functionality.

education

creative computing institute
MSc applied machine learning for creatives — 2025 - 2026

Applied machine learning to creative and interactive systems, exploring how AI can support human-centred design and new forms of digital interaction.

central saint martins
BA product and industrial design — 2022 - 2025

Developed consumer-product concepts through CMF exploration, electronics integration, and hands-on prototyping across multiple industrial-design projects.
